---

## Professional Summary

Drupal developer with 1 year of experience at **Innoraft Solutions Private Limited**. Proven expertise in developing and maintaining dynamic web applications using **Drupal, PHP, and JavaScript**. Successfully contributed to key projects, including **HCLTECH, LPG Management System, RTE-MIS**.

---

## Education

Degree/Certificate	Institute/Board	CGPA/Percentage/Rank	Year
B-Tech	MAKAUT	8.98	2023
WBJEE	WBJEE	24,434	2019
Higher secondary	WBCHSE	86.2%	2019
Secondary	WBBSE	80.14%	2017

---

## Experience

- **Innoraft Solutions Private Limited**

*1yr-present*

Projects names where I have worked.

1. **HCLTECH**

Worked on a Drupal-based project, gaining experience in managing different content types and handling dynamic workflows through custom modules.

2. **LPG Management System**

Contributed to a Drupal project that tracks the maintenance of LPG cylinders, including their selling prices and related tasks.

### 3. RTE-MIS

Developed a system in which students are managed across districts, schools, and states, implementing various permissions and operations to streamline the process.

---

## Personal Projects

- **iamconverter.com — A social platform developed in Drupal.** *Sep-2023*

[iamconverter.com](https://iamconverter.com) is a knowledge-sharing platform where users can create questions or answer existing ones and set a price for their contributions. Other users who wish to view the answers can pay, and the payment is sent directly to the person who provided the answer.

Tools/Technologies: **Drupal, PHP, JS, Payment Gateway.**

- **Respecto — Women Security-Based Real-time Application.** *Oct-2022*

The app is able to send messages to selected contacts, an SOS message with latitude and longitude. This is a team project and I played the lead developer role here.

The app can work in the background, even the app is removed from recent activity.

Tools/Technologies: **Android Studio, Java, XML, GPS system.**

- **Node.js & MongoDB-based real-time website** *Jan-2021*

A Kerala tourism-based website where users have to fill a form which is connected with Express.js and MongoDB to send and store responses in a database.

Through this project, I've learned JavaScript and also got the idea of web application backend technologies.

Tools/Technologies used — **JavaScript, HTML, CSS, MQL, Visual Studio.**

- **Floating Note-taking application** *July-2020*

This app is available on the [play store](https://play.google.com/store/apps/details?id=com.floatingnotepad)

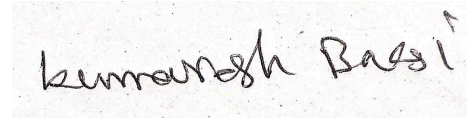

This is a floating notepad developed on Android Studio using java and XML language. In this app, users can note their data while they are doing any other work in other applications.

---

## Technical Skills

- **Programming Languages** — PHP, JS, Twig.
- **Markup Languages** — HTML, XML, SCSS, CSS.
- **Technology** — Web Development, Android Development.

- **Database Management** — MySQL.
  - **Operating System** — Linux, Windows.
- 

A handwritten signature in black ink on a light-colored background. The signature reads "Kurnanagh Bassi" with a small upward-pointing arrow above the final 'i'.
